

Profile

Software Engineer with experience in backend and full-stack development, specialising in the design of high-performance, cutting-edge systems. Passionate about low-level systems and video game development. Seeking a challenging role where I can apply my skills to create innovative solutions.

Interests

Music: I love listening to a wide variety of genres, from jazz and classical to metal.

Fitness: I go to the gym to stay active and energetic throughout the week.

Programming: In my spare time, I study new concepts and work on various personal projects

Projects

Jay: Jay is a programming language that has been a side project of mine for years. While it's an ongoing project, working on it continues to be very stimulating. It is written in pure Rust, and I plan to create a compiler with support for LLVM-IR.

WebSpocket: A client for connecting to WebSockets, written in Deno with low-level control over packets.

LiIDB: A database written in Rust that uses the gRPC protocol for communication. It also includes a custom BSON-like file type.

Loris Cuntreri

Software Engineer

Experience

SME Careers

July 2025

Software Engineer - Freelance | Remote

I develop high-performance backend infrastructure using Rust and refine AI models for complex code analysis. My work focuses on enhancing scalability, reliability, and model comprehension of Rust language nuances, memory safety, and idiomatic patterns.

GoSport srl

Dec 2023 - June 2025

Back end developer | Remote

As a backend developer, I have designed and developed scalable RESTful APIs for Empoli FC and Experience Summer Camp, managing traffic peaks during matches using technologies such as Rust, JavaScript/TypeScript, and MongoDB.

Sea Of Thieves Italia

2021 - 2022

Discord & Fullstack Developer | Remote

As a full-stack developer, I create custom solutions for the official Discord ecosystem, focusing on optimising latency in bot responses and ensuring reliable integration with game/web APIs.

Education

2021 - 2022

MERN-Stack Developer

Strive School

I completed a 9-month intensive web development course at Strive School (now Epicode). Throughout the programme, I successfully delivered on all project 'build weeks' and passed every assessment

2018 - 2023

Diploma I.T.C.G. Informatico

I.T.C.G. Masullo Theti

Skills

Programming Languages

- Rust
- JS/TS

Backend

- Axum, Tokio, Serde, Lettre
- Node, Deno, Express.js
- MongoDB
- gRPC

Low level systems

- Concurrent programming (Async & MT)
- Foreign Function Interfaces
