<> Skills

Languages: Rust, JS/TS

Backend: Axum, Tokio, Serde, Lettre, Node, Deno, Express.js, MongoDB, gRPC

AI: RAG pipelines, LLM inference, embeddings

Low-level: Concurrent programming (Async & MT), Foreign Function Interfaces

🌐 Languages

Italian (native), English

☆ Interests

Music: Jazz, classical, metal

Fitness: Gym throughout the week

Programming: Personal projects & learning

Loris Cuntreri

SOFTWARE ENGINEER

📁 Experience

Misarum

May 2026 – Present

Founder

Working on Misarum, an AI assistant that makes Italian law approachable, helping legal professionals find and understand what they need in the national legislation archive. I own the whole thing, from product to infrastructure.

SME Careers

Jul 2025 – Aug 2026

Software Engineer – Freelance | Remote

Developed high-performance backend infrastructure using Rust and refined AI models for complex code analysis.

GoSport srl

Dec 2023 – Jun 2025

Back End Developer | Remote

Designed and developed scalable RESTful APIs for Empoli FC and Experience Summer Camp, using Rust, JavaScript/TypeScript, and MongoDB.

Sea Of Thieves Italia

2021 – 2022

Discord & Fullstack Developer | Remote

Created custom solutions for the official Sea of Thieves Discord ecosystem.

🎓 Education

MERN-Stack Developer

2021 – 2022

Strive School (now Epicode)

9-month intensive web development course. Delivered on all project 'build weeks' and passed every assessment.

Diploma I.T.C.G. Informatico

2018 – 2023

I.T.C.G. Masullo Theti

📁 Projects

Jay 🤝 A programming language written in pure Rust with planned LLVM-IR compiler support. Currently dormant.

WebSpocket 🤝 WebSocket client written in Deno with low-level packet control.

LiIDB 🤝 A Rust database using gRPC for communication, with a planned SPUD binary file format.

AtebiEmu 🤝 A 6502 emulator written in Rust, published on crates.io.

spud 🤝 A custom binary file format for structured data, planned for use by the LiIDB ecosystem.
